Modulight vs. Traditional Wiring Method

Because of Copper and Steel pricing going up, Modulight is now making more sense to use on your next project. Not only can you save money on installed cost's, typical savings on projects that have been completed Locally are running around 35%. But now because of Copper and Steel, increasing every day, our wiring costs are almost half of MC cableing costs.. We also can offer to keep our wiring costs stable for 6 month intervals. So you can complete your projects without having to worry about wire going up...

Other Benefits to Using our Modulight System

- **Safety (Eliminates line voltage at each fixture)**
- **Flexibility of design changes and fixture relocation**
- **Energy savings of up to 10%**
- **Potential Tax benefits, portable lighting system**
- **You will be able to save your customer Money on their project by using Modulight, because of design changes, Labor savings and Cost savings...**
- **No Electronic ballast to maintain (major maintenance savings)
also most new fixtures with electronic ballast's have failure rates running between 5 and 10%**
- **6 year warranty on all products, including Fixtures, Power Converters and Class 3 Wire**

If you have any questions, or would like an onsite demonstration of our Modulight products, please give us a call.

Thank you for your time,

Respectfully,
